## HIGHLY ACCLAIMED INSTITUTE

*"CGRI holds the distinction of being India's exclusive  
IAO-accredited institute."*

## ABOUT CGRI

At ClinoGenesis Research Institute, we believe that education is the key to unlocking potential, especially in fields as critical as clinical research and bioinformatics. We're not just another online learning platform—we're a group of dedicated professionals passionate about making quality education accessible to everyone, regardless of where you are in your career.

Our journey began with a simple goal: to create courses that genuinely make a difference. We understand the demands of the healthcare and life sciences industries because we've been there. That's why our courses are carefully crafted by experts who bring their real-world experience into the classroom. We want our students to leave not just with knowledge, but with the confidence and skills to apply it.

Whether you're just starting out or looking to advance in your career, we're here to guide you. At Clinogenesis, it's not just about learning—it's about growing together and making an impact.

...

# Goals

## OUR MISSION

At ClinoGenesis Research Institute, our mission is simple yet profound: to empower the next generation of clinical researchers and bioinformatics professionals with the knowledge, skills, and confidence to make a real difference in the world. We believe education should be more than just a transfer of information—it should inspire, challenge, and drive individuals to achieve their full potential. That's why we are dedicated to providing high-quality, accessible online courses that blend theoretical learning with practical application, ensuring our students are ready to tackle the complexities of the modern healthcare and life sciences industries.

## OUR VISION

We envision a world where education knows no boundaries and every aspiring professional, regardless of their background or location, has the opportunity to excel. Our vision is to become a global leader in online education for clinical research and bioinformatics, shaping a community of learners who are passionate about innovation, committed to ethical practices, and driven to improve health outcomes on a global scale. By staying at the forefront of industry trends and continuously refining our curriculum, we aim to cultivate leaders who will not only succeed in their careers but also contribute meaningfully to the advancement of science and medicine.

# OUR OBJECTIVE

Our primary objective is to deliver high-quality, accessible, and relevant education that aligns with the needs of the global healthcare and life sciences sectors. We are dedicated to continually updating our curriculum to reflect the latest advancements and to provide our students with a competitive edge in their careers.

# OUR SERVICES

ClinoGenesis Research Institute stands out because of our unwavering commitment to excellence. Our courses are developed and taught by industry experts with extensive experience in their respective fields. We offer a unique blend of theoretical knowledge and practical insights, ensuring that our students are well-prepared to tackle real-world challenges. Additionally, our online platform is designed for flexibility, allowing learners to progress at their own pace while benefiting from a supportive learning community.

# WHY WE'RE THE BEST ?

At ClinoGenesis Research Institute, our experienced mentors provide industry-focused training to ensure you excel and stand out during placement opportunities.

ClinoGenesis Research Institute provides a structured approach with targeted assessments, mock interviews, skill-building presentations, and leadership development, preparing you for real-world professional challenges.

# WHY CHOOSE US ?

## ➤ **Recognized Accreditation**

CGRI is an IAO-accredited institution dedicated to guiding learners toward successful careers. Our mission is to provide expert mentorship, help students identify suitable career paths, and ensure continuous support for their professional growth.

## ➤ **Expert Faculty and Mentors**

Our mentors bring over three decades of combined experience in healthcare, pharmaceuticals, and research. Their industry expertise ensures students gain practical, real-world knowledge essential for their careers.

## ➤ **Career Assistance & Placement Guidance**

CGRI maintains strong partnerships with leading recruiters, offering complete placement assistance to help students secure rewarding job opportunities.

## ➤ **Flexible and Customized Learning Programs**

We provide a range of flexible learning options, including foundational and advanced courses, available in both online and offline formats. Our programs are tailored to meet the unique needs of each student.

## ➤ **Accessible & Affordable Education**

CGRI is committed to delivering high-quality education at affordable costs, making professional training accessible to all.

## ➤ **Practical Training and Skill Development**

Our programs integrate hands-on training, regular assessments, mock interviews, and presentations. These activities are designed to build confidence and equip students with the skills necessary to excel in their careers.

# AUTHORIZED & CERTIFIED INSTITUTION

Our institute has gained global recognition as a top choice for students pursuing careers in Clinical Research. With industry-focused programs, expert faculty, and a hands-on approach, we equip students with the knowledge and skills needed to succeed.

Through personalized mentorship, real-world projects, and internships, we ensure that our students are prepared to meet the demands of the ever-evolving clinical research field. Join us to take the first step toward a successful career in clinical research.

# P G DIPLOMA IN CLINICAL RESEARCH

 ( 11 - 12 - MONTHS )

## MODULE COVERED

### Non Technical Modules ( 02 Months )

- Soft Skills Training
- Aptitude

### Technical Modules ( 10 Months )

- Clinical Research
- Pharmacovigilance
- Clinical Data Management
- Regulatory Affairs
- Medical Writing
- Medical Coding ( Minor Module )
- Bio Informatics ( Minor Module )

# NON TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

## ▶ **Soft Skills**

- Communication Skills
- Teamwork and Collaboration
- Emotional Intelligence
- Time Management and Productivity

## ▶ **Corporate Etiquette**

- Professional Behavior and Conduct
- Business Etiquette

## ▶ **Interview Preparation**

- Resume Building and Cover Letters
- Interview Skills

## ▶ **LinkedIn Session**

- Resume Building and Cover Letters
- Interview Skills

## ▶ **Additional Resources**

# TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

## ► Clinical Research ( CR )

- Introduction to clinical research and basics of clinical trials trend
- Pharmacology concepts and phases of clinical trials ,types of clinical research, Epidemiological studies
- Drug Development process module
- History of Clinical trials and ethics(IRB/IEC) and ethical guidelines
- Terms and definitions
- Regulations guiding clinical trials and national/international regulatory bodies
- Outsourcing of clinical research and functionality of trials, stakeholders
- Clinical trials designs
- Virtual clinical trials
- Sponsor and CRC responsibility
- Pre-site visit,site initiation, routine monitoring and site closeout
- Protocol writing and designing
- crf and IB
- Inform consent process
- Document and data management in clinical trials
- IND and NDA,ANDA
- Schedule Y, appendices
- Trial Master File

# TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

## ► Pharmacovigilance ( PV )

- Introduction to PV
- Definition and classification of ADRs
- Detection, reporting and causality assessment
- PV in India and global perspective
- PV methods, passive surveillance: spontaneous reports & case series
- Active surveillance: drug event monitoring and registries
- Basic tools used in PV
- Safety studies
- Importance of PV
- Pharmaceutical preparation (adverse effects)
- Product surveillance and post-marketing
- Signal detection and follow-up
- Communicating safety signals with stakeholders
- Erice declaration
- Risk management studies
- Introduction to translational medicine
- Drug monitoring
- PV in drug regulation
- Overview of various software used in PV

# TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

## ► Clinical Data Management ( CDM )

- Introduction to CDM
- Glossary and abbreviations
- Guidelines for CDM
- Data management Plan
- CDM process
- Review and finalization of documents
- Database designing
- Data collection and CRF tracking
- CRF designing CRF processing and inventory from site
- Data entry,data validation and discrepancy management
- Medical coding and database locking
- QA/QC checks and data storage archival
- Tools for CDM
- Roles and responsibilities in CDM

## TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

### ► Regulatory Affairs ( RA )

- Good regulatory practices
- Regulatory aspects of Drugs,Biologicals and medical devices
- Regulatory considerations for Pharma development
- Fundamentals of intellectual property & technology development
- Introduction to regulatory toxicology
- Biostatistics
- Regulatory aspects of herbals and biologicals
- Documentation and regulatory writing
- Clinical research regulations
- Stability testing
- Bioethics

# TECHNICAL MODULES

 ( 11 - 12 -MONTHS )

## ► Medical Writing ( MW )

- Medical English: Writing, editing, and reading skills.  
Scientific tools for medical writers
- Medical publication writing
- Year Project: medical journal publication
- Drug development and regulatory affairs (DD/DRA).  
Regulatory framework – types of studies and phases –  
regulatory documents for clinical trials – the CTD and  
its parts
- Writing for medical communications (MC). Conference  
reporting –presentations and slide kits –  
training/medical education materials – publication  
writing
- Advanced language skills – Quality control of written  
material

# TECHNICAL MODULES

 ( 11 - 12 - MONTHS )

## ► **Medical Coding ( Minor Module )**

### **Anatomy & Physiology**

- ENT
- Eye
- Blood System
- Nervous System
- Digestive System.
- Urinary System
- Lymphatic System
- Endocrine System
- Respiratory System
- Cardiovascular System
- Integumentary System
- Musculoskeletal System
- Female Reproductive System
- Male Reproductive System

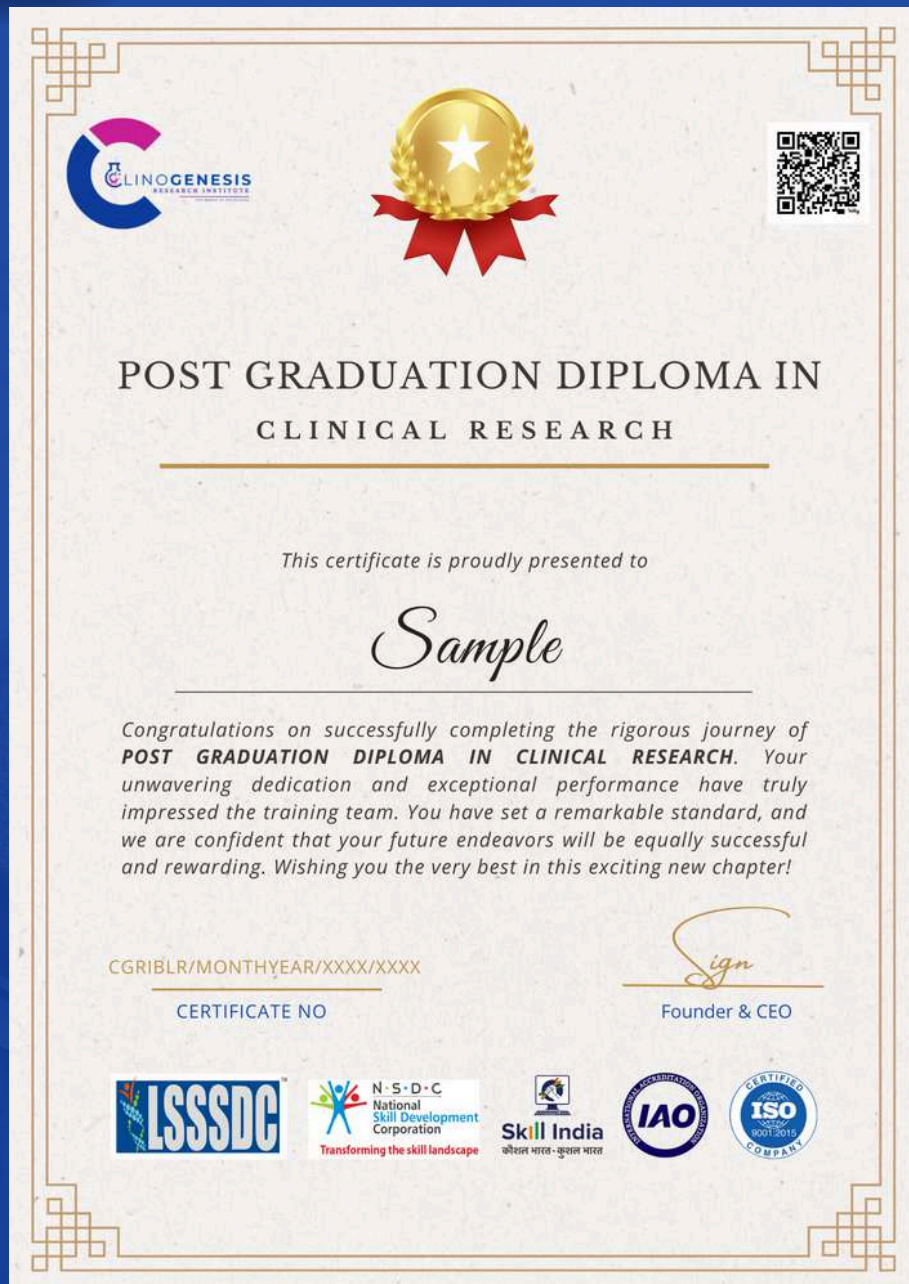

## ► **Bio Informatics ( Minor Module )**

- Basic and Advanced Bioinformatics
- Structural Bioinformatics
- CADD or Genomics
- Project
- Python or R in Bioinformatics

# SAMPLE CERTIFICATE OF PG DIPLOMA IN CLINICAL RESEARCH

# ELIGIBILITY CRITERIA

## What Are the Eligibility Criteria for Entering the Field of Clinical Research?

- Clinical Research
- Anatomy
- Molecular Biology
- Biochemistry
- Genetics
- Chemistry
- Microbiology
- Toxicology
- Bioengineering
- Immunology
- Physiology
- Pharmacy
- Dentistry
- Medicine

# JOBS IN CR DOMAIN

## Clinical Research

- CTC - Clinical Trial Coordinator
- CTA - Clinical Trial Associate
- CRC - Clinical Research Coordinator
- CRA - Clinical Research Associate
- CMS - Centralized Monitoring System

## Pharmacovigilance

- Junior Drug Safety Associate / Specialist
- Analyst in Safety Assurance

## Clinical Data Management

- Data Analyst
- Data Specialist
- Lead CDM manager

# **JOBS IN CR DOMAIN**

## **Regulatory Affairs**

- Regulatory specialist
- Compliance officer
- RA Officer
- RA Project Manager

## **Medical Writing**

- Associate medical writer
- Medical writer
- Principal writer
- Consultant writer

If you're considering a career in clinical research, I highly recommend Clinogenesis Research Institute. The trainers are really good at simplifying complex topics, and they give personal attention to each student. I never felt left out, and I always felt supported. Plus, the placement assistance was great—I was offered a job right after completing my training.

Clinogenesis Research Institute provided me with everything I needed to get started in clinical research. The training was comprehensive, and the trainers were always ready to assist whenever I needed help. I really liked how they used real-world examples to explain concepts, which made everything more relatable. The placement team is fantastic—they helped me secure a job soon after finishing the course.

I am so glad I chose Clinogenesis Research Institute for my clinical research training. The trainers are really experienced and made the lessons super easy to understand. They use a lot of real-life examples, which helped me grasp the concepts quickly. I loved how they broke things down into smaller steps, so nothing felt overwhelming. The placement support was also great, and I was able to land a job in the industry right after completing the course. If you're thinking about starting a career in clinical research, I definitely recommend this institute.

Joining Clinogenesis Research Institute was a game-changer for me. The clinical research course is extremely thorough, and the trainers are always patient, answering all your questions and explaining things in detail. One thing I didn't expect was how much practical exposure I'd get. They incorporated industry insights and corporate training, which gave me a deeper understanding of the clinical research process. We had guest speakers from top companies in the industry, and they walked us through real challenges they face in the field. The placement team also played a big role in my journey. They provided career counseling, helped with resume building, and gave mock interviews, making sure I was fully prepared. It wasn't just about finding a job—it was about preparing me to excel in my first role.

★★★★★ 5 days ago **NEW**

I'm really happy with my decision to join Clinogenesis Research Institute. The training was detailed and well-structured, with practical sessions and real-world case studies. The trainers made sure we had a solid understanding of clinical research principles, but what really made this program stand out was the corporate training. They arranged for professionals from the industry to come in and speak with us, giving us an inside look at the kind of work we would be doing after completing the course. It helped me understand the bigger picture and gave me more confidence in my abilities. The placement team at Clinogenesis was equally supportive. They helped with everything from resume writing to interview preparation, offering tips that helped me stand out to potential employers. Even though I haven't been placed yet, I know I'm better prepared for the job search because of their support.

When I first enrolled at Clinogenesis Research Institute, I didn't expect it to be such a rewarding experience. The training program was well-organized, and the trainers were very experienced. They made even the more complex aspects of clinical research easy to understand with real-world examples and practical case studies. One of the standout parts of the course was their corporate training. We had sessions with professionals from the industry who shared valuable insights into the day-to-day of clinical research work. It was eye-opening to hear directly from people working in the field. I also really appreciated the support from the placement team. They helped me understand how to tailor my resume for clinical research roles and gave me tips on how to stand out in interviews. Their guidance helped me feel confident and ready to take the next step in my career.

I had a really good experience at Clinogenesis Research Institute. The course was well-structured, and the trainers were very approachable. They explained things in a way that made them easy to understand, even for someone new to clinical research. I also appreciated the support I got with my resume and job search. It was a great place to start my career in this field!

I completed my clinical research course from Clinogenesis Research Institute, and I'm so happy with my decision. The trainers are amazing—they know their stuff and make sure you understand everything. They also gave us a lot of practice with mock interviews and resume-building, which helped me a lot during my job search. I'm now working in clinical research, and it's all thanks to the support I received from this institute.
